

My radio station that I listen to, K-LOVE, is effected by the FM translator issue. My station, K-LOVE is of great service to me and my community. They give us comfort and help us when there is a need. They have pastors on call day and night that can help people in times of crisis. There has been many times where they have prevented people from committing suicide, they have helped people through difficult situations. They give you positive and encouraging music that you can't find on any other radio stations. Please don't take away my K-LOVE.
